

ABTEILUNG SCHWIMMEN

Ideas for the IPC-Swimming Summit

1. Questions to IPC-Headquarter swimming

The sports manager has to work for the sport and the athletes. He/she is the person, who should be responsible for the administration, and work together with a new formed Executive Committee of IPC-Swimming.

- Licence system: it's necessary to announce athletes in the registration system whenever you need → we pay for it
- Rankings and records: should be in an actual standard. The new data system allows a quick supplement
- Good relationship between IPC and NPC-swimming: NPC should identify a person for swimming, so that the administrative way will be short and direct. He/she must be able to sign forms
- not to much administration

2. IPC-Swimming

- We need an Executive Committee for our sport with chairperson, head of classification and technical delegates. We must be involved in decisions make for our sport. The sport manager should work between the committee and IPC-headquarter.

3. Rulebook

The old rulebook is till 2008. So it's important to get a new one. New Fina-rules should be included if necessary.

4. Classification

For a good standard in classification we need a head of classification, which is able to make decisions for our sport.

- confidential work, so that everybody can understand the system
- permanent self-control in the system
- good communication with the head of classification
- IBSA-classifiers should be integrated

5. Championship-system

- just one point-system for all countries
- combined classes by this point-system

6. Other questions

- what will be the program for 2012 Paralympics
- how many races and athletes for swimming in 2012
- information by e-mailing when updates on the website
